Dear Hiring Manager,

I am confident I will be an excellent fit for Lockheed Martin's next Electrical Engineering Intern given my experience in electrical engineering and computer science. My innovative and technical skills I have gathered throughout my education and past employment allow me to be successful and provide Lockheed with technical solutions to a wide range of applications.

I have a passion for all things electronic, and I am pursuing this passion while working towards a degree in Electrical Engineering and Computer Science as a freshman at UC Berkeley. In the past year, I have developed my skills in systems, circuits, PCB integration, and data structures. Through my experience in Space Enterprise at Berkeley, I have applied my classroom knowledge by managing projects in avionics and ground control software. Most importantly, I have learned how to efficiently manage my workload, communicate effectively with co-workers, and when to ask for help. Additionally, my work across different platforms such as Arduino, Java, Python, and SQL has made me more adaptable.

I strive to create a positive work environment through enthusiasm and a desire to learn with hands-on technical work. As an intern at Lockheed Martin, I would be an asset to the organization by using my teamwork and communication skills, as well as my technical abilities. I would love the opportunity to further discuss my interest in this position, and can be reached at (407) 389 - 9778 or anthonymiceli@gmail.com.

Thank you for your time and consideration,
Anthony Miceli
